*H.S.C(88%)*

### Shri Guru Tegh Bahadur Academy

*S.S.C(88.6%)*

### Vadodara, Gujarat

*Graduation Year: 2024*

### Ratlam(MP)

*Graduation Year: 2020*

### Ratlam(MP)

*Graduation Year: 2018*

## SKILLS

---

**Programming Language:** C, C++, SQL, HTML, CSS, JavaScript

**Frameworks and Databases:** Tailwind, SASS, Bootstrap, React.js, MongoDB, NodeJs, ExpressJs

**Tools and Technologies:** Vs Code, Git & GitHub, Figma

## WORK EXPERIENCE

---

### Axel Technologies India Private Limited

### Surat, Gujarat

*React JS Developer*

*Jan 2024 - June 2024*

□ Designed and implemented user interfaces, ensuring an intuitive and visually appealing experience that aligns with high-quality design standards. Collaborated with developers to optimize user interaction and functionality, enhancing the performance and usability of digital platforms and applications. Collaborating with the development team to translate UI/UX designs into functional React components and Developing responsive and mobile-friendly interfaces to enhance the accessibility of web applications.

### Oasis Infobyte

### Remote

*Web Designer And Developer*

*Aug 2023 - Sept 2023*

□ One month task based internship. Learned and Improved my skills and works on tasks - Portfolio Website, Gym Landing Page and Temp-Converter Website.

## PROJECT EXPERIENCE

---

### Career Compass

□ Developed a career guidance website to help students make informed decisions about post-12th career options, including entrance exams and top colleges. Designed an intuitive user interface using HTML, CSS and Javascript ensuring a seamless and engaging experience for users. Integrated backend functionality by utilizing the CollegeDunia API and nodejs to provide real-time, reliable data on career paths, exams, and colleges.

### EShop

□ Developed a multivendor ecommerce website where multiple vendors (sellers) can register, list their products, and sell to customers. The website owner (admin) manages the platform and earns commissions from vendor sales. For the frontend, React.js is used to create a fast, interactive, and user-friendly interface, On the backend, Node.js and Express.js handle business logic, user authentication, and API requests efficiently. MongoDB is used for flexible data storage. For secure transactions, payment gateway Razorpay are integrated.
